### Roller Bearing

V-Lock bearing saves you time installing and removing. The patented double-tapered design of V-Lock bearings, made by QM Bearings, makes installation or removal a 10-minute task. The unique locking mechanism virtually eliminates fretting corrosion. Forget about setting clearances because they are preset at the factory and require no adjustment. Ideal for pulp and paper, sawmill, lumber and wood processing industries. V-Lock is a member of the Blue Brute family of bearings from QM Bearings.
